BY CRISTINA SUAZA

Experience world-class dental care at a fraction of the cost in Colombia compared to the US or Canada. Connect with us and discover affordable options for dental implants, veneers, and smile makeovers. Take advantage of savings without compromising on quality care.

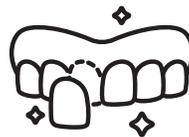

DENTAL CROWNS

Dental crowns restore and protect damaged teeth, using materials like porcelain to ensure a natural look.

DENTAL IMPLANTS

Dental implants are titanium posts surgically placed into the jawbone, serving as sturdy anchors for artificial teeth or crowns.

DENTAL VENEERS

Dental veneers are thin, custom-made shells bonded to teeth fronts, improving appearance by covering stains, chips, or misalignments.

SMILE MAKEOVER

A smile makeover combines cosmetic dental procedures like veneers, whitening, and implants to enhance aesthetics and functionality of the smile.

DENTAL CROWNS

Crowns are durable caps made from materials like porcelain or metal, designed to fully encase a tooth. They are typically used to restore a tooth's function and appearance following significant decay, damage, or for cosmetic enhancement.

Benefits of Dental Crowns:

- **Restores Function and Aesthetics:** Crowns provide a strong, protective cover, restoring a tooth to its original shape and function while enhancing its appearance.
- **Durability:** Made from robust materials, crowns withstand biting and chewing forces, making them a long-lasting dental solution.
- **Custom-Made Fit:** Each crown is tailored to fit perfectly over its specific tooth, ensuring comfort and a natural look.
- **Protection Against Further Damage:** Crowns shield the underlying tooth from further decay and damage.
- **Versatile Uses:** Ideal for protecting weak teeth, covering implants, attaching bridges, and restoring teeth that are severely worn or broken.

STARTING AT USD \$650

DENTAL VENEERS

Veneers are thin, custom-made shells crafted of porcelain or composite material, designed to cover the front surface of teeth. They are used primarily to improve the appearance of teeth by altering their shape, color, length, or size.

Benefits of Dental Veneers:

- Instantly enhances the aesthetic appearance of your smile.
- Covers stains, chips, and gaps between teeth that cannot be corrected by whitening.
- Requires less preparation than crowns, preserving more of the natural tooth structure.
- Offers a conservative approach to changing a tooth's color and shape.

STARTING AT USD \$7,000

CASE STUDY

In a comprehensive dental case study, Dr. Cristina Suaza transformed a patient's smile using a combination of porcelain veneers and dental implants. The veneers corrected discoloration and minor misalignments in the front teeth, while the implants replaced missing teeth, achieving a uniform and bright appearance. This procedure involved custom-designing both the veneers and implants to suit the patient's desired aesthetic, ensuring a seamless blend with the natural dental structure. The result significantly enhanced the patient's appearance and self-confidence, illustrating the dramatic impact of combining veneers and implants in cosmetic dentistry.

DENTAL IMPLANTS

Dental implants are a long-term solution for replacing missing teeth. They involve surgically inserting a titanium screw into the jawbone, which serves as a sturdy anchor for a dental crown. This process not only replaces the tooth but also helps preserve the jawbone's structural integrity.

Benefits of Dental Implants:

- Provides a look and feel similar to natural teeth.
- Prevents bone loss that accompanies tooth loss.
- Improves oral health and functionality.
- Offers a durable solution, often lasting a lifetime with proper care.

STARTING AT USD \$7,500

CASE STUDY

In a transformative dental case led by Dr. Cristina Suaza, a patient received a total makeover with the strategic placement of ten dental implants—six in the upper jaw and four in the lower jaw. This comprehensive approach not only restored full functionality to the patient's bite but also dramatically improved the aesthetic appearance of their smile. The precise implant placement integrated seamlessly with the patient's natural bone, ensuring durability and a natural look. This case exemplifies advanced dental restoration techniques, significantly enhancing the patient's quality of life and confidence.

SMILE MAKEOVER

A smile makeover involves one or several cosmetic dentistry procedures to improve the aesthetics of your smile. It could include veneers, crowns, whitening, and orthodontics, depending on the individual's needs.

Benefits of a Smile Makeover:

- Improves the overall appearance of the smile.
- Customized to address multiple aesthetic and functional dental issues.
- Boosts confidence and self-esteem.
- Can have positive impacts on overall dental health.

STARTING AT USD \$7,000

CASE STUDY

In a transformative smile makeover case, Dr. Cristina Suaza employed porcelain veneers, whitening, and dental crowns to address discoloration, misalignment, and missing teeth. The comprehensive approach revitalized the patient's smile, enhancing both function and aesthetics. Post-treatment, the patient displayed a radiant, well-aligned smile, boosting both oral health and self-esteem. This case highlights the dramatic impact of integrated cosmetic dental procedures in achieving a perfect smile.
